

Safety Self-locking feed yokes

- new from Wilson Agriculture

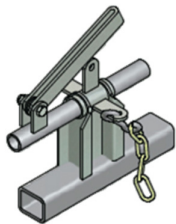

The newest addition to our range is the **Self-locking head yokes**. We utilize the latest technology of laser cutting and computer controlled forming to become more cost effective in the larger markets.

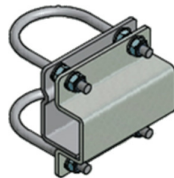

The Safety Self-lock is a double swing Self-lock which will allow the dairy cow to pull her head out of the bottom if she loses her footing.

The **Self-locking feed yokes** from Wilson Agriculture are all fully HOT DIPPED GALVANIZED.

Control Handle

Easy Mount Hardware

We can supply:

- 10ft (5 spaces) or
 - 15ft (7 spaces)
- These are fully adjustable.

These are some of the most **competitively priced** safety locking yokes available on the market.
